Simple Configuration Phonebook entries for the handsets can be edited using a simple PC interface, with changes and updates sent &quot;over the air&quot;. With 5 numbers stored per contact, you can be sure that it&quot;s easy to keep all your contact details up to date and organized. Audio Quality Panasonic considers high voice quality to be paramount &ndash; to ensure your message is understood. In common with our other SIP terminals, the new range of SIP-based DECT devices offers superb HD voice quality, using the G.722 wideband codec, for crystal clear call quality. Enhanced radio systems keep call quality clear even at the extremes of cell coverage, thanks to Panasonic&quot;s enhanced voice processing technology. Performance in noisy environments is also improved &ndash; ambient noise is intelligently detected and reduced, giving optimum performance in areas subject to high background noise levels. Automatic volume control is also included to enhance intelligibility. Multi-zone SIP based DECT The ability to handover calls seamlessly between DECT cells gives you the freedom to move anywhere in the organisation, staying in touch all the while &ndash; moving between cells in the same air sync group is completely transparent.
