

Do you Vu?

It's Time for a New Point of Vu.

Vu Technologies has dared to dream. A dream that redefines telepresence. A dream that will, in time, change the face of telecommunications.

We aim to replace one of the most revolutionary inventions ever - the telephone. Transform the way you connect with your clients by replacing everyday calls with face-to-face interactions in true high-definition quality.

*With Vu TelePresence,
 the world is your office!*

With Vu, all your business calls to anyone, anywhere in the world will be an in-person interaction at the click of a mouse. Simple, isn't it?

Here at Vu, we strive to make your business interactive, simple, and fun. So, when it's too important for a phone call but not enough to travel, Vu in style from the comfort and familiarity of your own workspace!

* Depending on your desired unit

Introducing Vu TelePoints!

The world is now your office with Vu TelePoint! We are setting up our systems in meeting rooms across the world, so you can just pay-by-the-hour and get Vu'ed anytime, anywhere!

Why Vu?

Low Bandwidth Requirements - T1 speed isn't necessarily the way the world gets online, and we understand that. All you need is 700 kbps for a full HD experience.

High-Definition Quality - With 720p or 1080p video, you will think you are having a conversation across the table.

Price Affordability - Vu is designed to be affordable without sacrificing quality. You can democratize video conferencing across your organization without breaking your bank.

Huge Cost Savings - Vu'ing reduces travelling expenses by reducing the need for travel. No airfare, no hotel, no expense account. It's that simple.

User-Friendly GUI - The ability to use any instant-messenger service is sufficient to prepare the user for the Vu experience - click to call, self view in a picture-in-picture window, and one-click screen sharing.

Ease of Deployment - The user manual included in the standard package comes in booklet and online format. No IT teams are needed for setup.

Life-Like Audio - HiFi Audio makes you feel like the person is sitting right across from you.

Great for Every Work Environment - It's simple to set up and easy to use, making Vu the perfect fit for your office, home, or boardroom. In fact, it's so simple and affordable that you will want to get one for all your key clients.

Ease of Operations and Control - Say goodbye to complicated remote controls! We provide a wireless or wired keyboard and mouse for your convenience.

Increased Productivity - You can Vu from anywhere! All the time and effort you save in travel means more time concentrating on the task at hand.

Global Directory Access - Forget IP addresses. In a matter of minutes, you can access the Global Vu Network and identify your parties through their thumbnail images. Vu comes with full privacy and security controls, so only Vu the people you choose.

VirtualFacets Technology - We developed state-of-the-art engineering techniques such as matrix-based color space conversion, advanced forward error correction, use of low-level processor libraries, and parallel programming to leverage the power of multi-core processors.

Additional Features - Multi-party conferencing, PC screen sharing, supports multiple HD displays, records and stores up to 3000 hours of video conference sessions.
