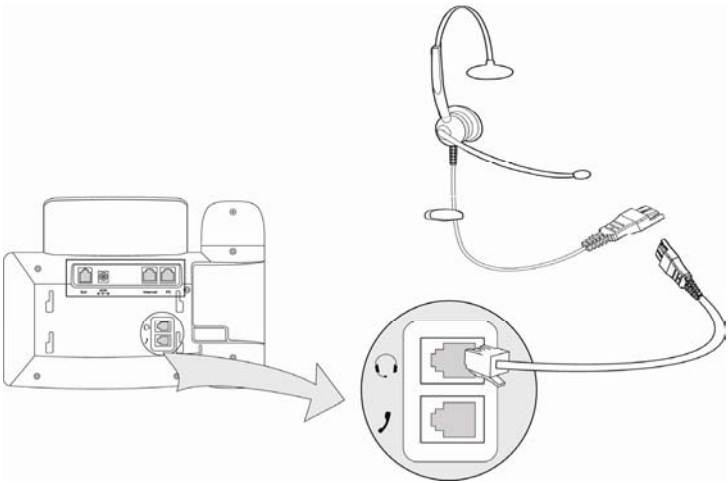
10. Quick disconnector
11. RJ9 Modular Connector

Connection

Figure	Description
	The headset is equipped with a quick disconnector. Users can connect the headset to a special adapter to connect to your IP phone.
	The headset are fitted with a standard modular connector. To use the headset models, simply insert the modular connector into the headset port of a compatible telephone.
	To adjust the headband, lengthen or shorten the adjustment rod until it fits comfortably. The click-stop feature keeps the headband securely adjusted. Position the headset receivers so that the foam cushions sit comfortably over the centre of your ears.
	On models with only one receiver, position the T-bar above your ear.
	Hold the receiver securely against your ear with one hand. With the other hand, Use the fixed boom, adjust the microphone to about one finger distance to your lips.
	The clothing clip helps to keep the headset properly positioned and free from the cord's weight. Attach the clothing clip at a comfortable level to liberate your hand.

The Yealink YHS32 is compatible with all of the Yealink Enterprise IP phones. We will take T28P for an example to make a brief description.



Usage:

1. When there is an incoming call to your extension, press the HEADSET button to answer it by the headset mode.
2. During a conversion, press the HEADSET button or pickup the handset, the conversion will switch between the headset mode and the handset mode.
