Industry Dynamics Skype VoiceGear Connect Express Edition (4 concurrent lines) Gateway

Product Name: Industry Dynamics Skype VoiceGear Connect Express Edition (4 concurrent lines) Gateway
Manufacturer: -
Model Number: VGC304S

Availability: In Stock Skype Integration for Small Business VoiceGear Connect Express Edition is a revolutionary Skype Gateway that allows for complete integration of existing PBX systems with Skype network. VoiceGear Connect Express Edition combines parallel Skype calling into a centralized solution specifically designed to meet the needs of any small business. VoiceGear Connect Skype Gateway acts as a bridge between your current phone infrastructure and Skype VoIP network enabling you to make/receive up to 8 concurrent Skype calls right from your existing office desk phones or extensions. Now you can communicate with over 300 million registered Skype users worldwide using a single centralized solution that is seamlessly integrated with your existing telephony infrastructure. Skype-enable your Existing PBX System and Save Money VoiceGear Connect Express Edition enables your existing office PBX system to support Skype calling, no matter whether it is Analog, Digital, VoIP, or Hybrid as long as it has available extension-side (FXS) or trunk-side (FXO) analog ports or can support SIP trunking. Simply connect the gateway to the Internet and to your company PBX system and start making Skype calls from existing telephone handsets without changing anything in your telephony infrastructure. Advanced telephony features such as IVR, three-way conferencing, call forwarding and call transfer already available with your PBX system are seamlessly incorporated into Skype calling. Using VoiceGear Connect Skype Gateway in your business can reduce your telecom infrastructure costs and operating fees by 30-90 percent given that most Skype calls can be made free or at a fraction of the cost as compared to traditional long-distance service providers. SIP Integraton with VoIP PBX Systems and Asterisk VoiceGear Connect Express Edition features native support for SIP voice over IP protocol enabling it to route calls between SIP PBX systems and Skype. This provides huge savings on telecom expenses, while encouraging cost-effective communication among distributed offices, subsidiaries, and customers. The power of Skype can now be integrated into VoIP PBX systems such as Cisco Call Manager and Asterisk without requiring any hardware interfaces. Many Ways to Save

ï¿½ Experience significant savings on long distance calls for your entire business with free Skype to Skype calls and ultra cheap SkypeOut rates
ï¿½ Toll-bypass for multi-site locations. Completely eliminate all intra-office communication costs with free Skype to Skype calls between all locations
ï¿½ Reduce roaming charges and eliminate all long-distance call charges on mobile phones
ï¿½ Allow your customers and suppliers to reach you completely free using Skype by calling your office PBX
ï¿½ Reduce your 1-800 costs by letting your customers use Web Click-To-Call to reach you with Skype directly from your Web site
ï¿½ Create global presense for your company with local SkypeIn numbers available in over 20 different countries world-wide
ï¿½ Eliminate costly traditional phone lines you have by replacing them with Skype
ï¿½ No contracts to sign and no upfront setup fees as compared to other phone and VoIP providers

Easy to Use! No PBX changes required... VoiceGear Connect Express Edition is an ideal solution for businesses or branch offices with 100 users and under. VoiceGear Connect automatically finds free lines for both incoming and outgoing calls, meaning that several people in your organization can simultaneously talk on Skype. VoiceGear Connect Express Edition is perfect for companies with multiple locations, remote employees, or customer-centric organizations looking to bridge the gap between the company and its customers, both domestically and internationally. Simply install multiple VoiceGear Connect Skype gateways in each branch office location and take advantage of

Industry Dynamics Skype VoiceGear Connect Express Edition (4 concurrent lines) Gateway

FREE Skype to Skype calls for all intra-office communications. After connecting VoiceGear Connect to your phone PBX system, anyone in the office is ready to use Skype from their existing desk phones. Simply pickup the phone and you are instantly ready to save big on all your long-distance calls due to FREE Skype to Skype calls and ultra-low SkypeOut rates. Reduce Mobile Roaming and Long Distance Charges Employees with access to WiFi hotspots or fixed Internet can use their personal Skype account to call the VoiceGear Connect gateway to reach the company PBX. Local employees working out of the office can use VoiceGear Connect gateway to make long distance calls over Skype using their mobile phone. Other Key Benefits

ï¿½ Seamlessly connects your existing phone system to Skype - the world's largest free VoIP network
ï¿½ Single corporate Skype hunt-group with automatic distribution for all incoming Skype calls
ï¿½ Make Skype calls directly from office desk phones. No need to have Skype running on corporate desktops
ï¿½ Bypass any Skype client security concerns with a single integrated, centrally administered solution
ï¿½ Comprehensive web-based administration interface

Features VoiceGear Connect Express Edition offers a multitude of features targeted towards reducing communication costs and increasing productivity of your office employees. Skype Trunking VoiceGear Connect Express Edition allows small businesses to leverage Skype, the world's largest VoIP network, as a trunking solution for their existing office PBX systems. By utilizing Skype trunking as an alternative to the PSTN, businesses can substantially save on both domestic long-distance and international calls. SIP Connectivity to the PBX VoiceGear Connect Express Edition offers SIP connectivity to most IP and hybrid PBX systems utilizing SIP G.711 codec. Native support for SIP connectivity extends the ability of VoiceGear Connect Express Edition to work with Asterisk based PBX systems by delivering high quality voice for up to 8 Skype channels. Extension-side (FXS)/Trunk-side (FXO) and SIP connectivity to the PBX VoiceGear Connect Express Edition offers a variety of connectivity options to any PBX system with available extension-side (FXS) or trunk-side (FXO) ports. We also support mixed connectivity option by utilizing both FXS and FXO ports available on the PBX. Mixed FXS/FXO connectivity is unique to VoiceGear Connect products and is essential to implementing advanced calling features. Dual FXS/FXO connectivity also simplifies installation and lowers your costs if all ports are in use by allowing the addition of line cards instead of more expensive trunk cards. Multi-site PBX Communication and Toll-bypass Employees in multiple branch offices equipped with VoiceGear Connect gateways can communicate with each other completely free using Skype. Calls between all extensions in branch offices equipped with VoiceGear Connect are carried over the Skype network without incurring any fees. Global Call Transfers over Skype All incoming landline and Skype calls can be transferred to any phone number or Skype ID, inside or outside the company office. Calls can be transferred at no cost to employees in branch offices equipped with VoiceGear Connect gateway, or to employee's mobile phones and landline numbers at low SkypeOut rates. (requires extension side connectivity to the PBX). Web Click-To-Call VoiceGear Connect Express Edition brings you Click-To-Call feature, which allows customers to call your company PBX directly from your Web site. Customers browsing your Web site can reach Customer Service, Sales or Support departments absolutely free over the Skype network with a simple click of a button added to your Web site. This can significantly reduce your costs for providing Toll-free numbers to customers. Other Features...
