Product Name: Industry Dynamics Skype VoiceGear SkyBridge (4 concurrent lines) Gateway

Manufacturer: -

Model Number: VGS304S

Availability: In Stock Skype Savings for Small Business VoiceGear SkyBridge is a revolutionary new product that allows for complete integration of existing VoIP, Hybrid and PSTN based PBX systems with Skype network. SkyBridge acts as a gateway between your current phone infrastructure and Skype network enabling you to make/receive up to 4 concurrent Skype calls right from your existing office desk phones. SkyBridge delivers multi-line Skype calling in a cost efficient package accessible to any small business. Now you can communicate with over 300 million registered Skype users worldwide using a single centralized solution that is seamlessly integrated with your existing phone system while saving big on all your telecommunication costs! Skype-enable your Existing PBX System and Save Money VoiceGear SkyBridge enables your existing office phone system to support Skype calling. Simply connect this Plug and Play solution to your PBX system and start making Skype calls from existing office phones without changing anything in your current telephony infrastructure. Advanced telephony features such as IVR, conference calling, call forwarding and call transfer available with your PBX system are seamlessly incorporated into Skype calling. Using SkyBridge in your business can reduce your telecom infrastructure costs and operating fees by 30-90 percent given that most Skype calls can be made free or at a fraction of the cost as compared to traditional long-distance providers. Many Ways to Save

• Experience significant savings on long distance calls for your entire business with free Skype to Skype calls and ultra cheap SkypeOut rates

• Allow your mobile employees to make long distance calls using Skype directly from their mobile phones

• Completely eliminate all intra-office communication costs with free Skype to Skype calls between all locations

• Allow your customers and suppliers to reach you completely free using Skype by calling your office PBX

• Reduce your 1-800 costs by letting your customers call you with Skype directly from your Website with a click of a button

• Create global presence for your company with local SkypeIn numbers in over 20 different countries world-wide

• Eliminate unnecessary regular phone lines you have by replacing them with Skype

• No contracts to sign and no upfront setup fees like with other phone and VoIP providers

Great for Small Business VoiceGear SkyBridge is an ideal solution for businesses or branch offices with 50 users and under. SkyBridge automatically finds free lines for both incoming and outgoing calls, meaning that several people in your organization can simultaneously talk on Skype. This will substantially reduce your communications costs due to FREE Skype to Skype calls and ultra-low SkypeOut rates. VoiceGear SkyBridge is perfect for companies with multiple locations, remote employees, or customer-centric organizations looking to bridge the gap between the company and their customers, both domestically and internationally. Simply install multiple SkyBridge Communicators in each branch office location and take advantage of FREE Skype to Skype calls for all intra-office communications. Easy to Use! No PBX changes required... After connecting the VoiceGear SkyBridge to your phone PBX system, anyone in the office is ready to use Skype from their existing desk phones. Simply pickup the phone and start dialing to save big on your long-distance calls due to FREE Skype to Skype calls and ultra-low SkypeOut rates. VoiceGear SkyBridge also enables your customers to reach you completely free over the Skype network using a single corporate hunt-group account. All incoming Skype calls are directed to your company PBX system just like any regular landline call. In addition, with SkyBridge and Skype

Industry Dynamics Skype VoiceGear SkyBridge (4 concurrent lines) Gateway

Click-To-Call feature, your customers can call your company PBX simply by clicking a Call-Me button on your Website. Other Key Benefits

- Seamlessly connects your existing phone system to Skype - the world's largest free VoIP network
- Single corporate Skype hunt-group with automatic distribution for all incoming Skype calls
- Make Skype calls directly from office desk phones. No need to have Skype running on any office computers
- Bypass any Skype client security concerns with a single centrally administered solution

Features VoiceGear SkyBridge offers a multitude of features targeted towards reducing communication costs in your small business as well as increasing productivity of your office employees. **Skype Trunking** VoiceGear SkyBridge allows small-medium size business to leverage Skype, the world's largest VoIP network, as a trunking solution for their existing office PBX systems. Utilizing Skype trunking as an alternative to the PSTN, businesses can substantially save on both domestic long-distance and international calls. **SIP Connectivity to the PBX** VoiceGear SkyBridge offers SIP connectivity to most VoIP and hybrid PBX systems. Native support for SIP connectivity extends the ability of VoiceGear SkyBridge to work with most SIP based PBX systems by delivering high quality voice for up to 4 Skype channels simultaneously. **Extension-side / Line-side and Mixed Connectivity to the PBX** VoiceGear SkyBridge offers a variety of connectivity options to any PBX system with available extension-side (FXS) or line-side (FXO) ports. We also support mixed connectivity option by utilizing both line and extension ports available on the PBX. Mixed FXS/FXO connectivity is unique to VoiceGear SkyBridge products and is essential to implementing advanced calling features. Mixed Line/ Extension connectivity also simplifies installation and lowers your implementation costs. **Multi-site PBX Communication and Toll-bypass** Employees in multiple branch offices equipped with VoiceGear SkyBridge gateways can communicate with each other completely free using Skype. Calls between all extensions in branch offices equipped with VoiceGear SkyBridge are carried over the Skype network without incurring any fees. **Global Call Transfers over Skype** All incoming landline and Skype calls can be transferred to any phone number or Skype ID, inside or outside the company office. When employees are working away from the office, you can easily transfer the call to another branch office equipped with VoiceGear SkyBridge gateway absolutely for FREE, or to employee's mobile phones and landline numbers at low SkypeOut rates. **Web Click-To-Call** VoiceGear SkyBridge brings you Click-To-Call feature, which allows customers to call your company PBX directly from your Web site. Customers browsing your Web site can reach Customer Service, Sales or Support departments absolutely free over the Skype network with a simple click of a button added to your Web site. This can significantly reduce your costs for providing Toll-free numbers to customers and improve your customer service in all departments. **Other Features...**

- Complete integration of Skype into your existing office PBX system allowing for handling incoming/outgoing Skype calls via your existing office phones
