Valcom VIP-D425 4 Digit 2.5 Inch Clock

Keeping time accurate and consistent throughout a large facility is easy with Valcom's new IP PoE Clocks - simply add a clock to any location on the network via RJ-45 connection. Power to the clock is provided by Power-Over-Ethernet (PoE) eliminating the need to add costly power outlets. Installation is easy and inexpensive and allows quick and easy relocation of clocks throughout a facility. The VIP-D425 2.5 inch, 4 Digit Clock Display and VIP-D440 4.0 inch, 4 Digit Clock Display enable time indication, synchronization, and correction over an IP-based LAN/WAN. This allows locating a clock display anywhere on the network. Clock synchronization is initiated via connection to a factory preprogrammed time server. The enclosure is made of steel with a durable powder coated finish. The color of the enclosure can easily be changed to match any décor. Power is provided to the VIP-D425 and VIP-D440 via a Power over Ethernet (PoE) switch meeting the 802.3af specification. Manufacturing Facilities – Synchronized time promotes adherence to schedules keeping the entire team consistently meeting productivity goals. Healthcare - Daily healthcare requires synchronized time schedules which are critical for patient care and timely delivery of medications. Schools & Universities - Accurate timekeeping is crucial in transitioning students from one class to the next. Access control systems (security) require synchronized timing.....doors lock at a certain time all across the campus. VIP-D425 4 Digit 2.5 Inch Clock Core Features
