Draytek VigorIPPBX FXO4P Analogue FXO Module

Product Name: Draytek VigorIPPBX FXO4P Analogue FXO Module

Manufacturer: -

Model Number: FXO4P

Please Note: The Draytek VigorIPPBX FXO4P Analogue FXO Module is now End of Life. For alternative products, please see our selection of DrayTek Routers.

Draytek VigorIPPBX FXO4P Analogue FXO Module

The FXO module provides four inputs for analogue (POTS) lines. This allows integration of your existing phone lines into the Vigor IPPBX3510. You then can continue to use your analogue lines, but also enjoy the advanced features of the Vigor IPPBX and deploy IP extensions. This is a true hybrid solution for legacy systems. Incoming calls on analogue lines or VoIP can be distributed to extensions exactly as you wish, and outgoing calls made over analogue line or your VoIP trunk according to your own preferences.PSTN Expansion ModulesThe Vigor IPPBX 3510 primarily uses a VoIP Trunk for its connectivity to the PSTN, and IP phones on users' desks. there will be many situations, however, where you have legacy equipment or lines already installed which you wish to continue to use, either temporarily or indefinitely even once the IPPBX is installed. The PSTN module slots on the Vigoro IPPBX 3510 allow you to do that - providing connectivity for analogue lines, analogue extensions, ISDN lines and ISDN PBXs.
