Redfone VGate-Quad 120 Channel License

Product Name: Redfone VGate-Quad 120 Channel License
Manufacturer: -
Model Number: VGATE-QUAD

Redfone VGate-Quad 120 Channel License
The Redfone VGate is a VMWare compatible turn-key software appliance. When combined with foneBRIDGE2 hardware it quickly and easily provides a complete T1/E1 to SIP gateway with advanced SIP features including SIP load balancing and auto fail-over to provide always on capabilities. Leveraging the benefits of virtualization, Redfone customers can now:

ï¿½ Consolidate voice and other platforms onto a single server
ï¿½ Reduce hardware and operational costs, accelerate provisioning, cen
ï¿½ tralize management, and increase overall system availability and surviv
ï¿½ ability.

Target Applications

ï¿½ Standalone T1/E1 to SIP Gateway trunking with Remote SIP PBX
ï¿½ T1/E1 to SIP Gateway trunking to local SIP PBX internal to VMWare or on separate hardware

ï¿½ T1/E1 to SIP Load Balancing to multiple SIP PBXs or SIP applications
