Positron G-1000 IP PBX

The G-1000 Office Gateways by Positron Telecom provide businesses with 250 employees or more a scalable and affordable Business Phone System that takes advantage of all the latest features and functionality and combines them into an easy to manage and configure device. Backed by our free support service, multilingual user configuration and auto configuration phone application, businesses will be content for years to come. Positron believes it should be easy for you to choose a Business Phone System so we make it as simple as possible. There are no hidden extras, no support fee, we support a multitude of phone manufacturers and we don't limit the configuration. The G-1000 provides a very unique feature set for its price point in the market offering over 150 simultaneous calls and the ability to sustain 60 simultaneous call recordings when combined with the ability to add unlimited extensions and unlimited IVRs it is hard to compete against this powerful offering. Not only will the Positron G-Series Office Gateways save you money but we will also help your corporate image by allowing you to easily configure and customize your voice prompts, welcome messages and call flow through the system. This will allow customers to stay happy and reach the right person quickly and easily. Applications: Enterprise Phone System / Inbound Call Center Highlights:
