Sangoma Vega 400 Fractional T1/E1 (16 channels) VEGA-VS0111-016

The Sangoma Vega 400 VoIP media gateway connects digital telephony equipment to IP networks.

The Sangoma Vega 400 16 Channel media gateways are supplied with four E1/T1 interfaces which are always fully available regardless of the license which has been purchased.

The unit is purchased pre-licensed to suit the initial requirements of the customer for the quantity of concurrent VoIP calls desired through to 16 VoIP channels. Future expansion is easily achieved in the field & can be provisioned by means of further licenses and expansion modules.
