Sangoma Vega SBC VM/Hybrid 250 to 500 Session Upgrade

The Sangoma Vega SBC VM/Hybrid 250 to 500 Session Upgrade is the most cost-effective, easiest to provision, and easiest to manage Session Border Controller on the market. The Sangoma Vega SBC VM/Hybrid 250 to 500 Session Upgrade provides full-featured protection and easy interconnection at the edge of enterprise networks.

Sangoma Vega SBC VM/Hybrid 250 to 500 Session Upgrade Key Applications

- SIP Trunking
- Remote Worker
- Hosted PBX
- Lync SBC
- Core Session Router and Load Balancer

IP communications across multiple, sometimes untrusted, networks needs to be normalized, managed and secured. There is a need to guarantee interoperability of multiple devices, carriers and protocols in a transparent way to the user of the network. Session Border Controllers take care of the conversion between protocols, transcoding, threat prevention, resource limiting, and accounting at the edge of VoIP networks of enterprises and carriers alike.
