

Cisco SPA302D Multi-Line Cordless DECT Handset

Product Name: Cisco SPA302D Multi-Line Cordless DECT Handset

Manufacturer: -

Model Number: SPA302D

Cisco SPA302D Multi-Line Cordless DECT Handset

The Cisco SPA302D is a DECT handset designed exclusively for use with the Cisco SPA232D Multi-Line DECT ATA (not included). Together, these products enable the convenience of a cordless on-premises mobility solution for voice-over-IP (VoIP) service. Cisco SPA302D DECT Handset Key Features

- Ability to make high-quality feature-rich business-quality VoIP calls with cordless handset convenience
- High-resolution color display with hands-free speakerphone and four-way menu navigation button
- Superior performance and range along with highly efficient battery power usage based on DECT technology
- Essential telephony feature support such as caller ID, call transfer, call waiting, call forwarding, three-way conferencing, call history, and private and shared phonebooks
- Cost-effective, multiline on-premises mobility solution capable of registering up to five handsets to a Cisco SPA232D Multi-Line DECT ATA supporting four simultaneous active calls
- Highly configurable and secure remote provisioning capabilities to enable mass-scale service provider activation and deployment
- Ideal solution for residential, small office or home office (SOHO), and business environments

The SPA302D is an enhanced DECT handset, designed primarily for business environments that require a cordless phone to support not just one, but multiple telephone numbers or lines. This provides a highly innovative VoIP solution for users who tend to frequently move about their location, but must always be reachable around the premises.
