

IC-Talk Media Manager Soho - MM16

Product Name: IC-Talk Media Manager Soho - MM16

Manufacturer: IC Talk

Model Number: -

Availability: In Stock

16 User Solid State IP PBX

The MM16-Soho Range is tailored for smaller office / home office environments where space is limited and noise can be an issue.

With these criteria in mind we have created the Soho series, it a a small footprint (190mm x 195mm x 83mm) wall mountable system which is solid state (no moving parts) and hence is silent in operation.

Despite the small size of the device do not underestimate the power of the system as these are capable of running up to 16 Users (32 User upgrade available 1st quarter of 2007) and a whole wealth of features normally only found on enterprise class systems.

Including:

- 8 Hours of Recording time for voicemails and greetings
- 6 Months of Call Detail Logging (export to CSV available)
- 2 x Multiway Conference Rooms (pin code protected)
- 2 x Queues
- 30 x Ring Groups
- Unlimited SIP trunks
- and loads more...

Packs all the punch of a larger business phone system, without the cost!

Hardware Specification

Power: 230V AC 50Hz. External Power Adaptor max. consumption 80W (average running consumption 12-25W).
