snom HS-MM3 Headset

The snom HS-MM3 Headset has been updated with a new look and improved ergonomics and usability. With the Snom headsets, Snom provides a complete product line for use in a variety of Internet telephony environments: SMEs (small and medium-sized enterprises), home offices, and call centers.

The Snom HS-MM3 is the perfect complement to the Snom 300 phone - whereas the HS-MM2 headset is designed for the Snom 320 , 360 and Snom 370 VoIP phones.

Snom's HS-MM2 and HS-MM3 monaural headsets provide users with more headset stability, ease of use, comfort and hands-free convenience in everyday communication. The Snom monaural headset has one ear pad which can be worn on either ear. With the noise-canceling microphone, the Snom headset keeps the user's voice crystal clear.

The Snom Headsets are a safe investment for your business, giving users working in telephone-intensive roles more flexibility, freedom and comfort. The use of headsets optimises the operating process and increases overall productivity.

For further information on the compatibility of IP headsets to VoIP Phones please see our VoIP Headset compatibility guide
