

2N EasyGate PRO (5013381E)

Product Name: 2N EasyGate PRO (5013381E)

Manufacturer: -

Model Number: 5013381E

Please Note: This product has been discontinued.

2N EasyGate PRO

The 2N EasyGate PRO is a single-channel analogue GSM / UMTS gateway. It is a solution based on mobile network used for a fixed line replacement. Compared with 2N EasyGate, it can also be equipped with battery backup. This makes it especially suitable for environments requiring resistance against power outages.

2N EasyGate PRO UMTS Advantages and Features

- Significant reduction in call costs
- Landline replacement
- High-speed data connection over UMTS
- Remote supervision and configuration
- Calling and SMS services

Cost savings with the 2N EasyGate PRO UMTS

In this scenario companies connect the UMTS gateway 2N EasyGate PRO UMTS to their existing PBXs with an analogue interface. All calls to mobile networks are routed via the 2N gateways and customers can save up to 70 percent on their calling costs.
