 Discus Windows Dual Mode Smartphone DP-SW20 Pirelli's DP-SW20 is a compact Smartphone combining quad-band GSM and VoWLAN telephony based on the SIP standard in a single device.

The DP-SW20 Pirelli Discus Dual Mode Phone is a compact smart-phone combining quad-band GSM and Voice over WLAN (VoWLAN) telephony based on the SIP standard in a single device. Based on the powerful Windows Mobile operating system, the DP-SW20 offers the convenience of a whole range of applications such as SMS, MMS, Outlook, e-mail, Tasks and Calendar management, Internet Explorer Browsing, MSN messenger, Voice Recorder and a number of utilities offered by the Windows environment.

When at home, in the office, or under a hotspot coverage, the DP-SW20 allows to leverage on a Wi-Fi connection, making voice and data services available at a higher speed and at a lower cost. The DP-SW20 is designed and qualified to operate in a multi-vendor, standards-based environment.

It also features Pirelli's software enhancements on Quality of Service, manageability and advanced Fixed Mobile Converged services such as Voice Call Continuity.

Moreover, the DP-SW20 can seamlessly integrate within Pirelli's technology bundle for quadruple play services, which comprises:

Pirelli's Multiplay Access Gateways, serving as multiservice routers with advanced MIMO WLAN capabilities specifically enhanced for VoIP and video-streaming applications over WiFi.

Pirelli's AWR WLAN extender, a self-configuring Wi-Fi repeater supporting extended indoor coverage and seamless WLAN roaming.

Pirelli's DuMan Management System, an application allowing Over The Air (OTA) remote provisioning and firmware upgrade to streamline service delivery and customer support tasks for VoWLAN services based on dual mode handsets.
