Sangoma Vega Enterprise SBC VM/Software 250 Call Upgrade

The Sangoma Vega Enterprise SBC VM/Software 250 Call Upgrade is the most cost-effective, easiest to provision, and easiest to manage Session Border Controller on the market. It provides full-featured protection and easy interconnection at the edge of enterprise networks.

Sangoma Vega SBCT-VMS-U250 Key Applications

- SIP Trunking
- Remote Worker
- Hosted PBX
- Lync SBC
- Core Session Router and Load Balancer

IP communications across multiple, sometimes untrusted, networks needs to be normalized, managed and secured. There is a need to guarantee interoperability of multiple devices, carriers and protocols in a transparent way to the user of the network. The Sangoma Vega Enterprise SBC VM/Software 250 Call Upgrade takes care of the conversion between protocols, transcoding, threat prevention, resource limiting, and accounting at the edge of VoIP networks of enterprises and carriers alike.
