

Hitachi DMP330 (DMP-330) Dual Mode Handset

Product Name: Hitachi DMP330 (DMP-330) Dual Mode Handset

Manufacturer: Hitachi

Model Number: DMP-330-S

Availability: Discontinued

Please note that the Hitachi DMP330 has been discontinued. We recommend the UniData WPU-7800 WiFi SIP handset (without GSM functionality) as the closest alternative.

The Hitachi DMP330 is a Dual mode handset supporting both GSM (900/1800/1900) and WLAN (WiFi) networks. The handset can be used like a GSM mobile phone in normal circumstances, and when located in a WiFi hot spot, at home or in the office, the DMP330 can switch to WLAN mode and be used to make VoIP over WiFi calls.

The DMP330 is multimedia feature rich as well as practical, featuring a 1.3 megapixel camera, MP3 player, video player, internet browser and more. All this weighing in at under 90g.

Key features:

- 1.8" LCD screen (175*220 resolution)
- Tri-band GSM
- VoIP over WiFi (SIP)
- WLAN (802.11b/g)
- MP3 Player (MP3, AAC, AAC+)
