

## Algo 1202 Call Button

Product Name: Algo 1202 Call Button

Manufacturer: Algo

Model Number: Algo-1202

Algo 1202 Call Button for Emergency Alerting, Notification and Customer Assistance

The Algo 1202 Call Button offers a reliable and integrated solution for alerting with any Algo IP speaker, IP strobe light, 8301 paging adapter or 8061 relay controller. For any application requiring one-touch programmable announcement or alert notification, the 1202 is designed as a simple and intuitive interface for emergency and non-emergency alerting or for improving customer service.

With the exception of the 8061 relay controller, the 1202 Call button can be configured via a compatible Algo IP endpoint for button press activation to initiate one of the following actions:

- Multicast an alert or announcement.
- Make a SIP call to a configured extension to play a discreet notification when the call is answered.
- Make a SIP call to a configured extension and permit hands-free two-way communication (e.g. via the Algo IP speaker microphone).

The 1202 Call Button includes a bracket for wall mounting. A label template is also included for printing customized labels.

Applications

- Emergency, safety, and security notification in schools, manufacturing plant/factory, utility, and other workplace environments.
- Workplace medical emergency alert.
- Retail customer service assistance button.
- Assisted living and long-term care help button.
- Classroom or office intercom via an Algo IP speaker.
- Machinery or process control notification alert in a manufacturing plant, factory, or production environment.
- Help/assistance button at transport terminals (i.e., airport, bus, rail), hospital, government office, and other public buildings.

Algo 1202 Call Button for Emergency Alerting - Technical Specifications
