- Large, leatherette ear cushions
- Soft carry pouch included
- Up to 10 hours talk time

Noise-cancelling technologiesWith state-of-the-art noise-cancelling technologies, the Jabra Evolve headset range is specially designed to improve conversation quality. Its noise-cancelling microphone eliminates annoying and distracting background sound, allowing you to be more focused on your calls. In-call indicator lights ensure that you are not disturbed whilst on the telephone.

Quality soundThe E-STD standard microphone sensitivity is comparable to a normal telephone receiver, ensuring that no sound quality is lost by using a headset. Additionally, Wideband audio and Digital Signal Processing (DSP) technologies help to suppress echoes and clearly transmit your voice and music, to offer the highest quality experience, not only for softphone calls, but also for music streaming.

Range of up to 30 metresThe Jabra Evolve 65 features Bluetooth v3.0, offering up to 30m range from your PC/mobile/tablet, for full control of your communications and other tasks. Additionally, with NFC (near-field communication) technology, you only need to tap your Jabra Evolve 65 and Bluetooth device together in order to pair them, eliminating the fuss of standard Bluetooth pairing procedures.
