

Ascom D83 Talker Dect Handset (DH8-AAAA)

Product Name: Ascom D83 Talker Dect Handset (DH8-AAAA)

Manufacturer: Ascom

Model Number: DH8-AAAA

Ascom D83 Talker Dect Handset (DH8-AAAA)

The D83 Talker is an ultra-rugged DECT cordless telephone, dedicated to professionals working in extreme environments. Easy to transport thanks to its compact size, this product has undergone a whole battery of tests in order to be certified according to the most demanding robustness standards. Certified according to the IP67 index, this telephone is fully protected against dust as well as temporary immersion (at a depth of 1 meter and for a maximum of 30 minutes), its reinforced coating allowing it to perfectly withstand temperature variations, falls from a height of 2 meters as well as the multiple manipulations that it can undergo daily, for an improved longevity.

Ascom D83 Talker Key Features

- Professional DECT cordless phone
- Special extreme environment: resistant to shocks and falls
- 2.4" color TFT display with LED backlight
- LED indicator for incoming calls and messages
- Wideband HD sound transmission
- Noise canceling speaker and microphones
- Integrates 3 distinct directories: central, professional and local
- Autonomy: 10h in conversation ; 120h standby
- Connectivity: Versatile connector ; 3.5mm jack ; Bluetooth 5.0
- IP67 certified: protected against dust and temporary immersion

Encompassing a powerful 950mAh Li-Ion battery rechargeable using the Versatile Connector, this phone offers up to 120 hours of standby time, users being able to communicate for more than 10 consecutive hours, while enjoying a relatively fast recharge of their device, the latter needing only 4 hours to be charged to 100%.
