

Logitech SWYTCH (952-000010)

Product Name: Logitech SWYTCH (952-000010)

Manufacturer: Logitech

Model Number: 952-000010

Logitech SWYTCH (952-000010)

The Logitech SWYTCH (952-000010) enables a laptop to connect to a room's AV equipment for use with any video meeting or webinar. With an innovative design that maximises compatibility and incorporates DisplayLink® Plug-and-Display technology, Logitech Swytch offers a one-cable laptop link to a room's conference camera and display, making it easy for teams to meet, present, and stream over any service.

Swytch works in rooms outfitted with a dedicated computer or an appliance based conference camera that run video conferencing applications – including Microsoft Teams Rooms and Zoom Rooms – and in BYOM rooms equipped with a only conference camera and display. Simply connect Swytch to the laptop via USB and launch the desired application to enjoy broadcast-quality video and content sharing at up to 4K resolution.

With a one-cable laptop link to a meeting room's AV devices, Logitech Swytch makes every room ready for any meeting.

Logitech SWYTCH Key Features

- Never run out of power when hosting a video meeting
- Single connection is all you need for both USB devices and an HDMI display
- Display movies from a laptop on the room's display and speakers
- Featuring both USB Type A and Type C connectors
- Monitor and manage Swytch, MeetUp, Rally, and other meeting room devices with Logitech Sync

ANY MEETING, EVERY ROOMWith an innovative design that maximizes compatibility and incorporates DisplayLink Plug-and-Display technology, Logitech Swytch offers a one-cable laptop link to a room's conference camera and display, making it easy for teams to meet, present, and stream over any service.

THE FLEXIBLE ROOM SOLUTIONWith Swytch, you can deploy video conferencing room solutions from providers like Microsoft or Zoom , while also allowing people to use meeting rooms with other video services. Microsoft Teams Rooms.

SAY YES TO EASYTo join or host a video meeting, simply plug the iconic Swytch Connector into any laptop with a USB 3.0 or higher Type A or Type C port. No dongles, no splitters, no HDMI required.

SMART TOPOLOGYIt's easy to deploy Swytch in rooms with USB conference cameras. Just connect the Swytch Hub to the meeting room equipment and place the Swytch Connector within easy reach.

SMALL ROOM SETUPSSWYTCH + MEETUP With Swytch in focus and huddle rooms, users can meet face-to-face with customers, vendors, and other external hosts on their preferred video conferencing service. Show x-ray wiring diagram.

MEDIUM & LARGE ROOM SETUPSSWYTCH + RALLY With Swytch in medium and large rooms, the whole team can join webinars, take online classes, and engage face-to-face with customers and partners on external services. Show x-ray wiring diagram.

EVERYTHING IN ITS PLACESwytch integrates beautifully with your meeting rooms. Keep the tabletop clean and organized with the included magnetic dock, or route the Swytch Connector through an existing cable well. Either way, robust cable retention keeps connections tight.

URNS LAPTOPS INTO ROOM SOLUTIONSThanks to hidden cabling and a convenient magnetic dock, Swytch keeps every room tidy and organized, even those without dedicated

Logitech SWYTCH (952-000010)

computers. A single connection and straightforward user experience make it easy for anyone to use their personal laptop for team collaboration.

UP TO THREE YEAR WARRANTY Ensure optimal performance of your Logitech conference room hardware for a total of three years with the purchase of an Extended Warranty for Logitech Swytch, which adds one additional year to the standard two year limited hardware warranty.

POWER DELIVERY Never run out of power when hosting a video meeting: Swytch provides 60 watts of power to laptops that charge via USB-C.

PLUG-AND-DISPLAY Thanks to DisplayLink Plug-and-Display technology, a single connection is all you need for both USB devices and an HDMI display.

FULL MOTION VIDEO + AUDIO Display movies from a laptop on the room's display and speakers, and share full-motion video and audio into online meetings. Works with video conferencing services that support content sharing with audio.
